## Online Test for Guest Lecturer (Civil Engineering)

Which of the following is not a correct statement?

 Copy

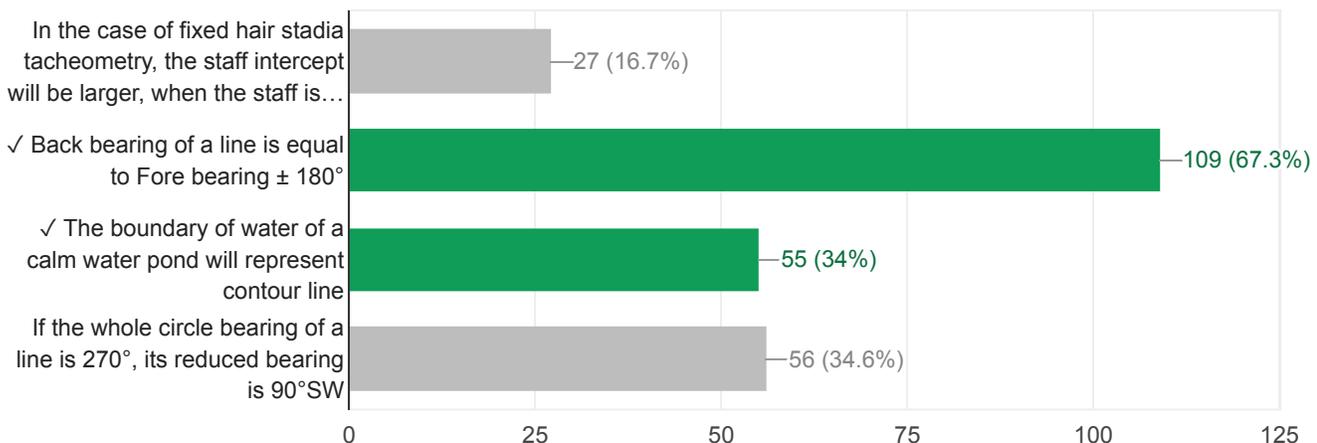

132 / 165 correct responses

Which of the following is/are correct statement(s) ?

 Copy

15 / 162 correct responses

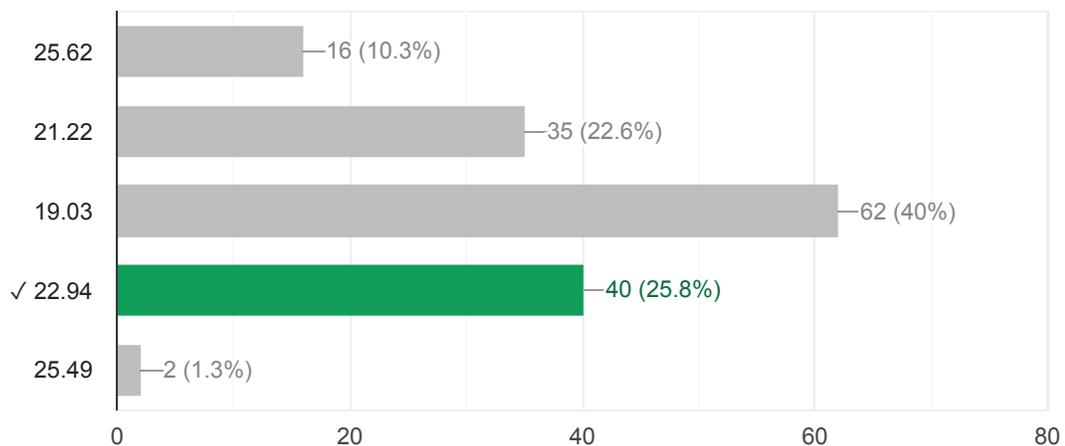

In shear design of an RC Beam, other than the allowable shear strength of concrete, there is also an additional check suggested in IS 456-2000 with respect to the maximum permissible shear stress. The check for max permissible shear stress is/are required to take care of

28 / 157 correct responses

A partially saturated soil mass has bulk unit weight of 25 KN/cu.m and moisture content of 18.5 %. The specific gravity of soil solids is 2.65. On full saturation of soil sample, the unit weight of the soil sample will be \_\_\_\_\_ KN/cu.m.

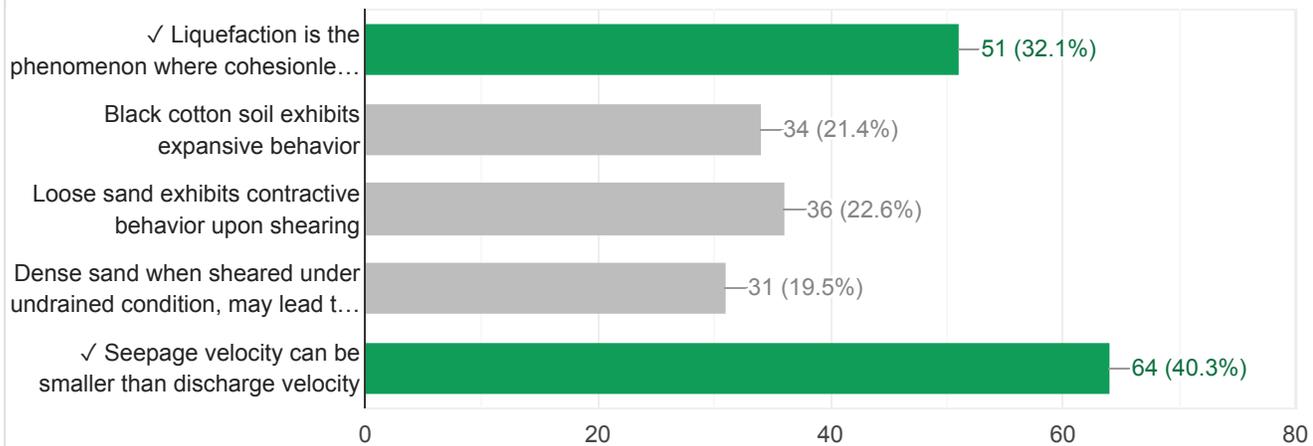

40 / 155 correct responses

Which of the following statement/s is/are not correct ?

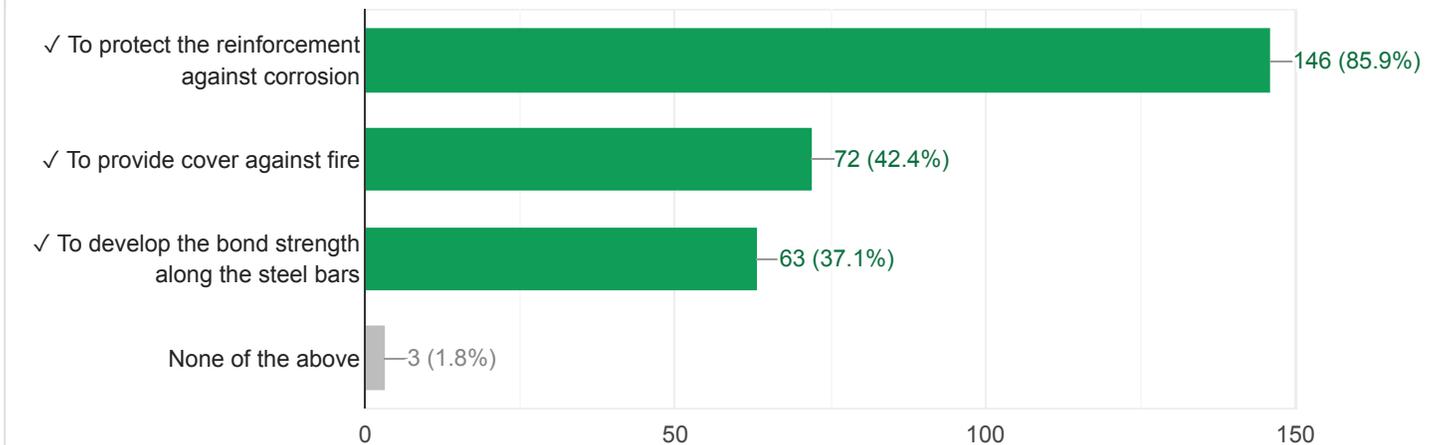

11 / 159 correct responses

Which of the following is/are correct reason(s) for providing nominal cover in RCC design ?

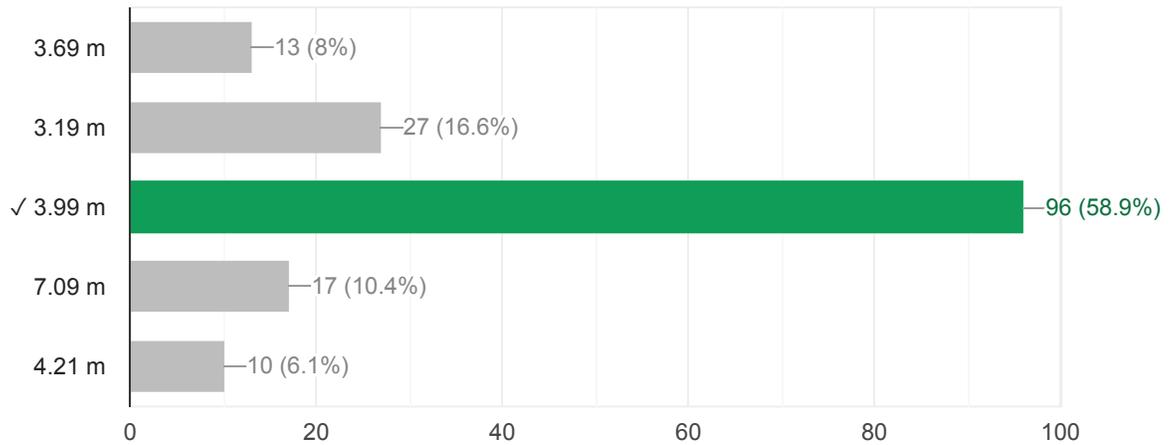

38 / 170 correct responses

A rectangular open channel of width 4.8 m is carrying a discharge of 120 cu.m/sec. The critical depth of channel is

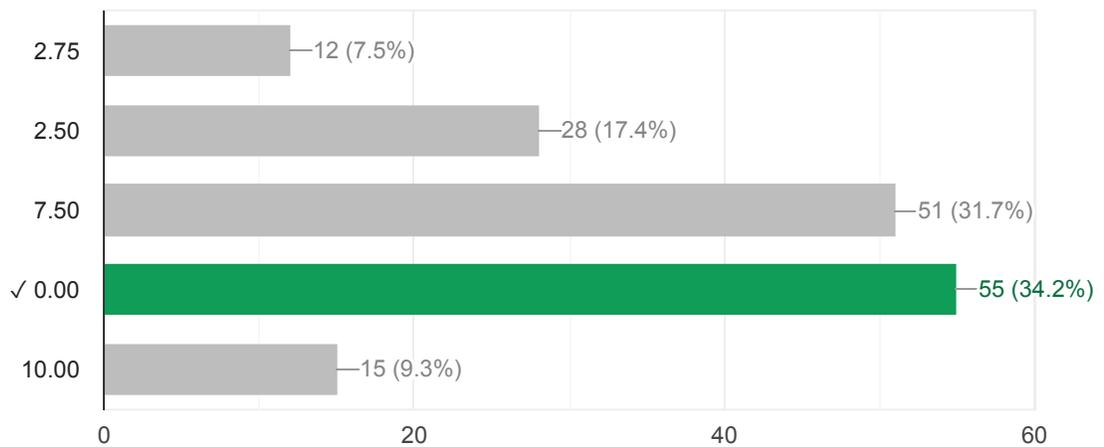

96 / 163 correct responses

For the beam loaded as shown below (see figure); the reaction at support Q will be \_\_\_\_\_ kN

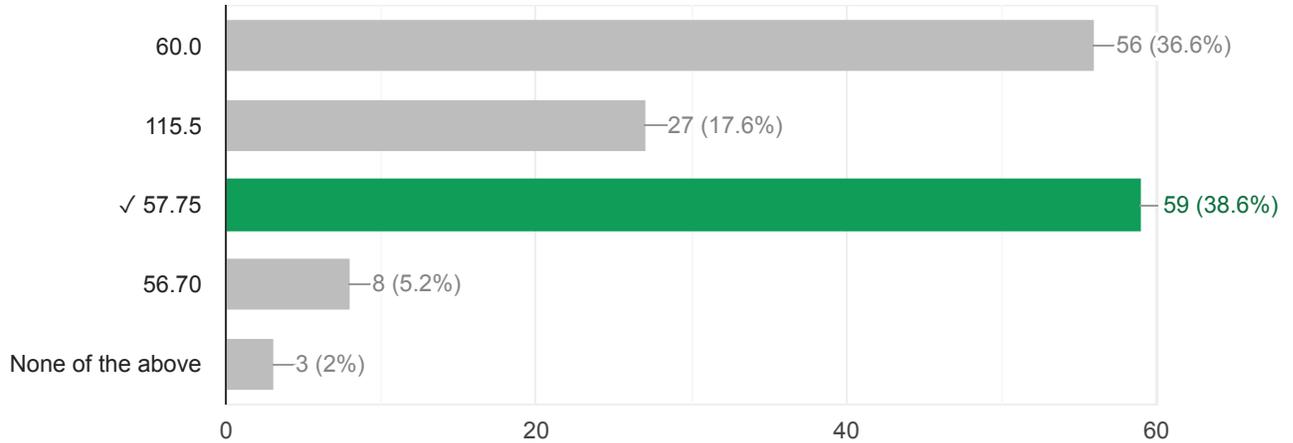

55 / 161 correct responses

A tension member consisting of 8 mm thick plate is connected a gusset plate of 8 mm thickness by a fillet weld of 6 mm size. The effective length of weld is 125 mm. The permissible stresses in plates and weld are 150 MPa and 110 MPa respectively. The safe load carrying capacity of member in kN will be

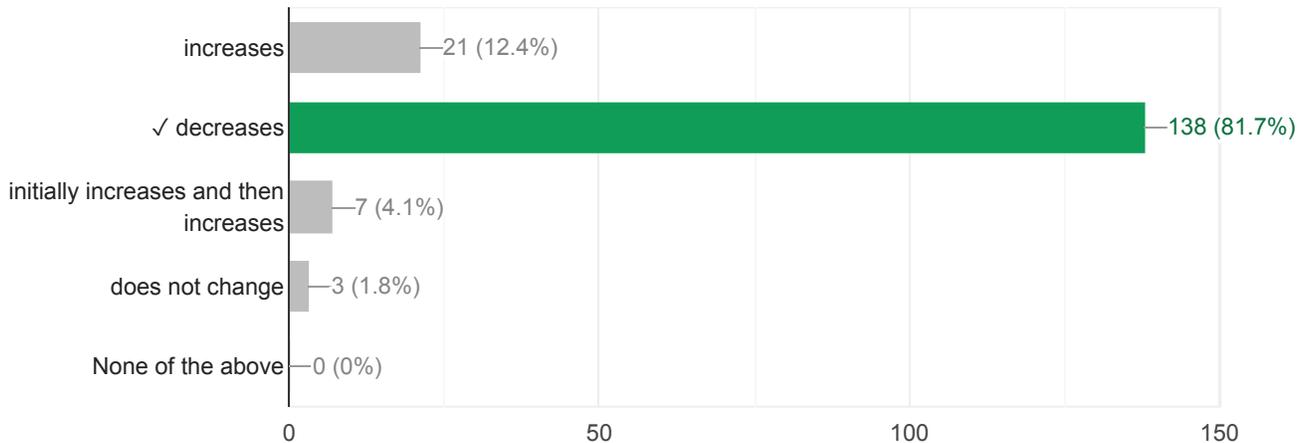

59 / 153 correct responses

Due to increase in Di-calcium Silicate content in OPC, the heat of hydration

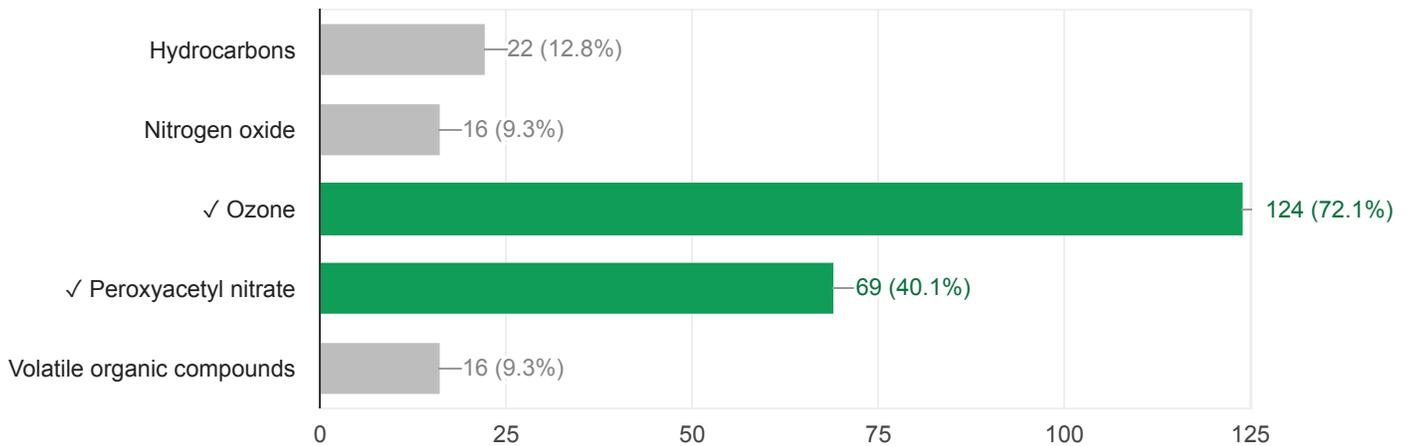

138 / 169 correct responses

Which of the following is/are not primary air pollutants?

 Copy

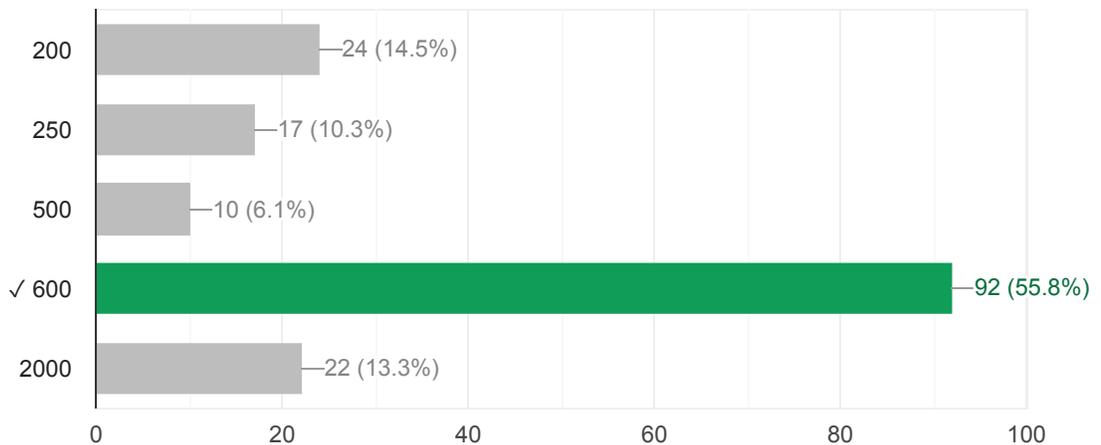

44 / 172 correct responses

As per IS 10500:2012; The maximum permissible limit of total hardness (as calcium chloride equivalent in mg/L) in absence of alternate source is

 Copy

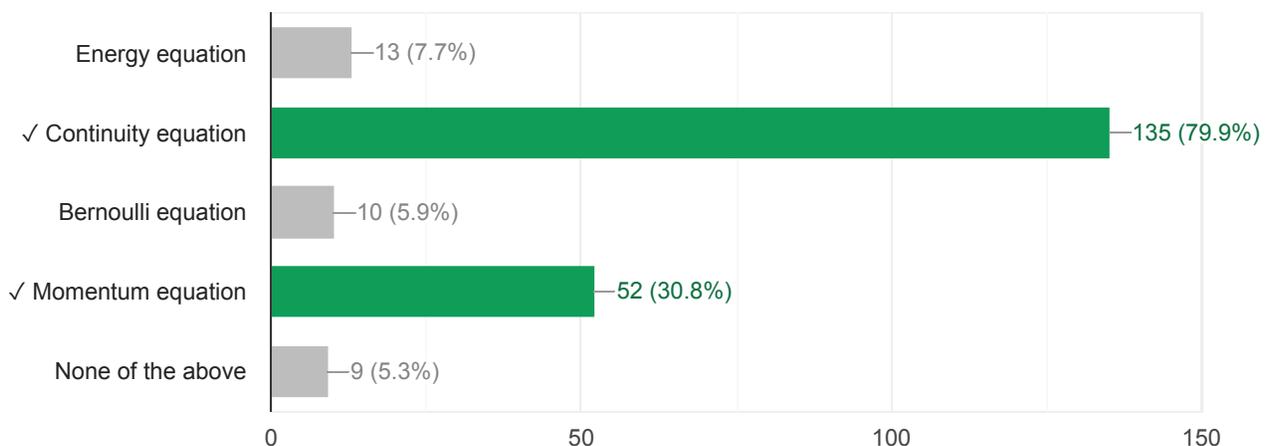

92 / 165 correct responses

The equation(s) used for the purpose of Hydraulic flood routing is/are

 Copy

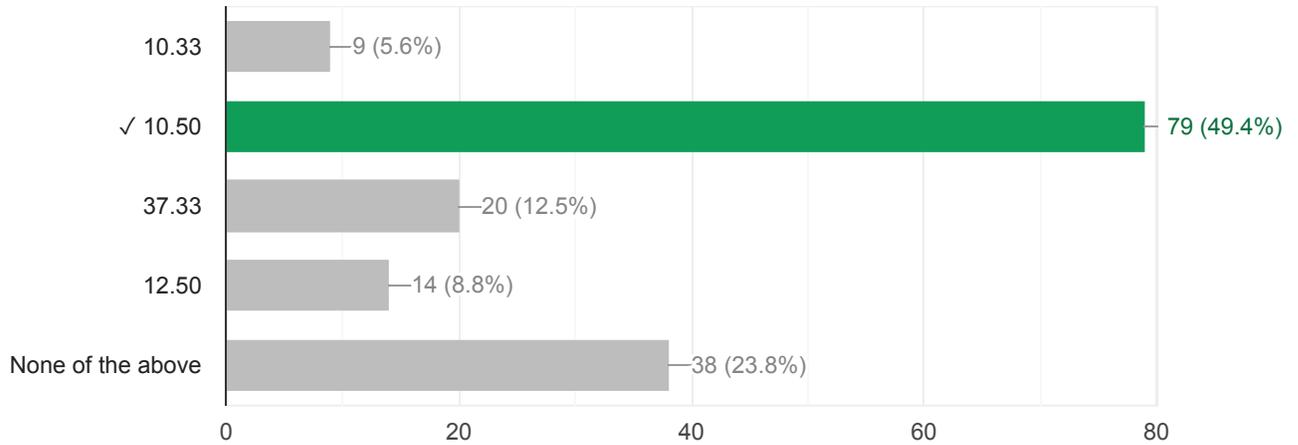

39 / 169 correct responses

If the optimistic time, pessimistic time and most likely time (in days) of an activity in the critical path are 8, 10 and 15 respectively, The value of expected time for the same activity will be

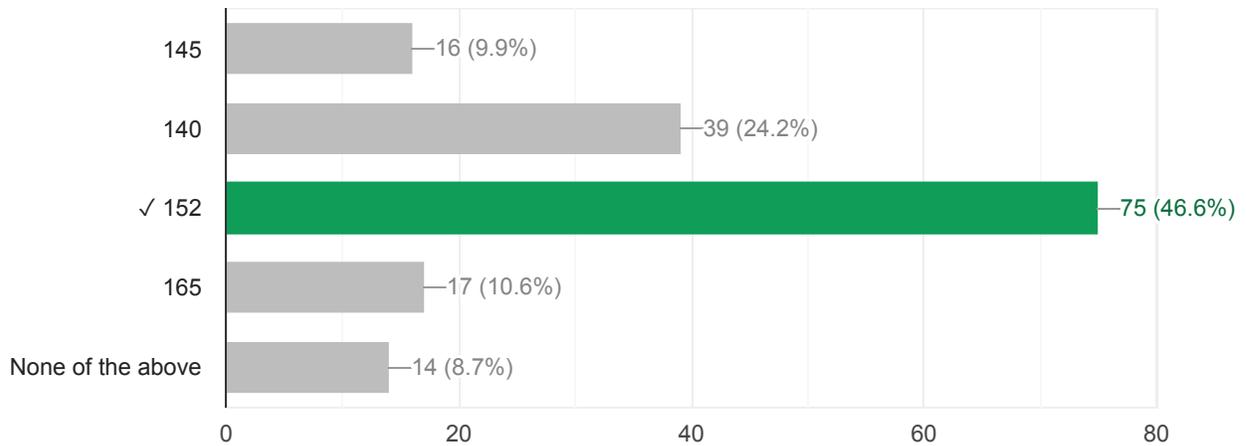

79 / 160 correct responses

For a highway, the design speed is 95 km/h. The acceleration due to gravity and deceleration rate are 9.81 m/sec square and 3.5 m/sec square. The reaction time is 2 sec. The stopping sight distance for highway will be \_\_\_\_\_ m approximately.

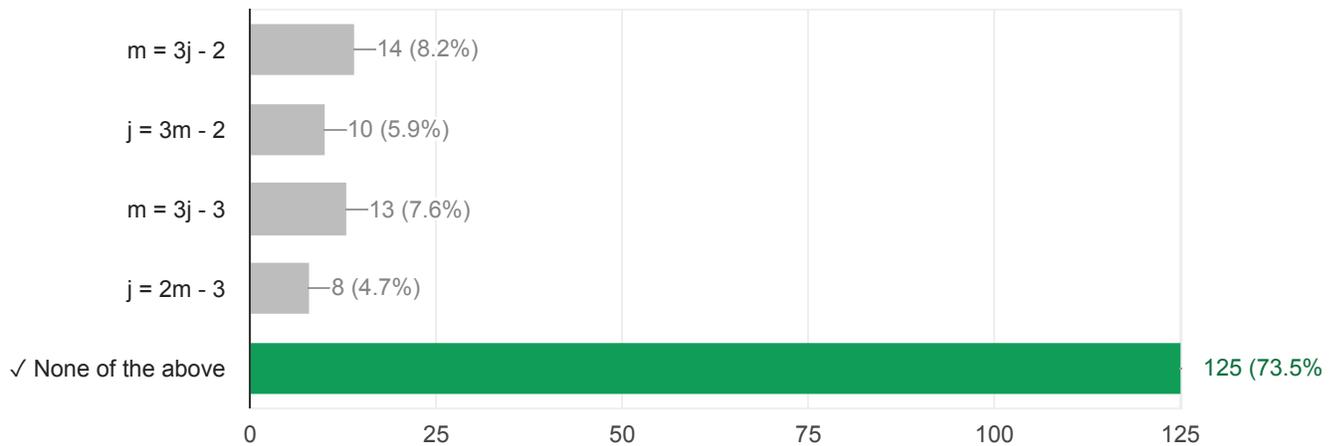

75 / 161 correct responses

A truss containing 'j' joints and 'm' members, It will be a simple truss if

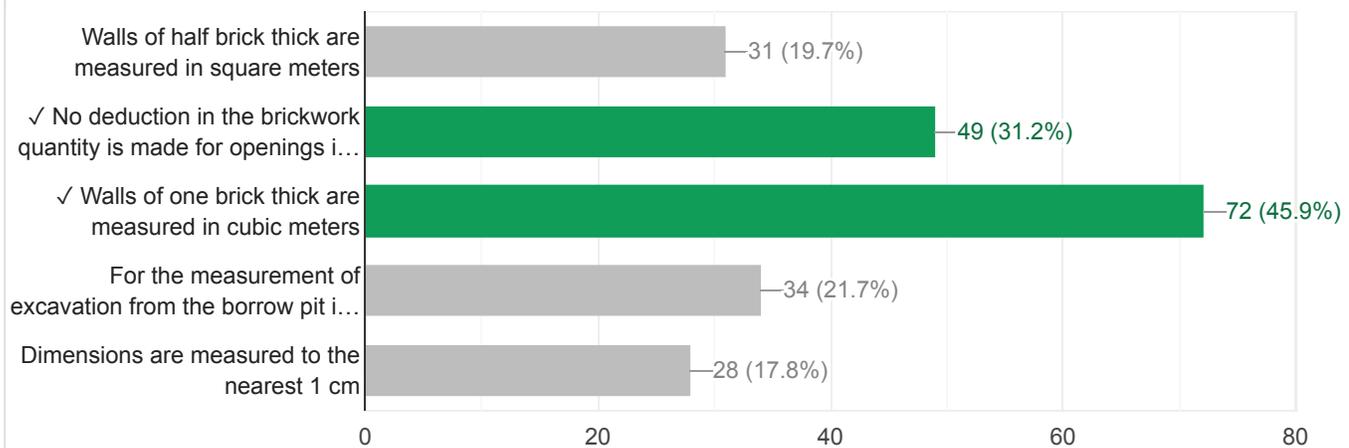

125 / 170 correct responses

Which of the following is/are False statement(s)?

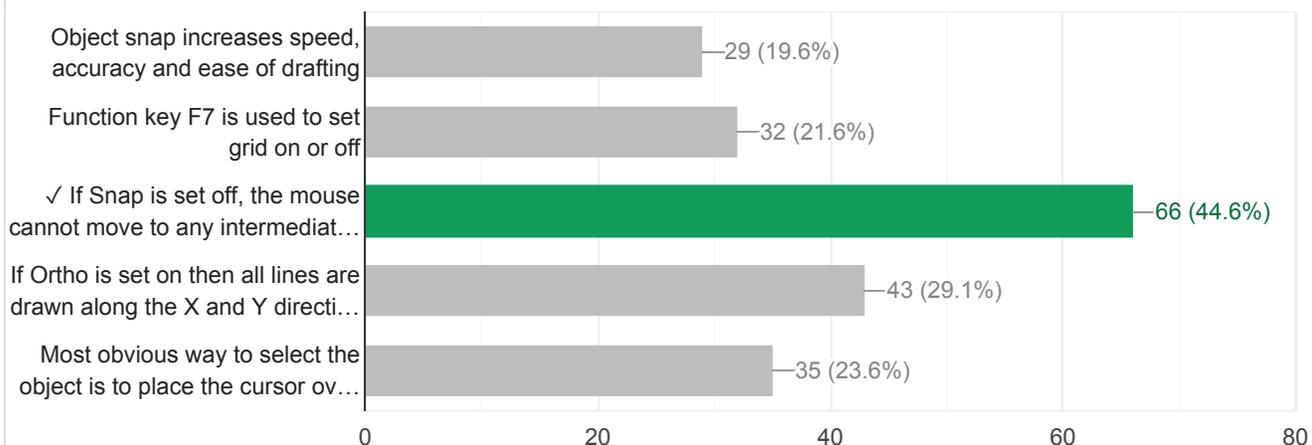

13 / 157 correct responses

Which of the following is/are incorrect statement(s) related to AutoCAD ?

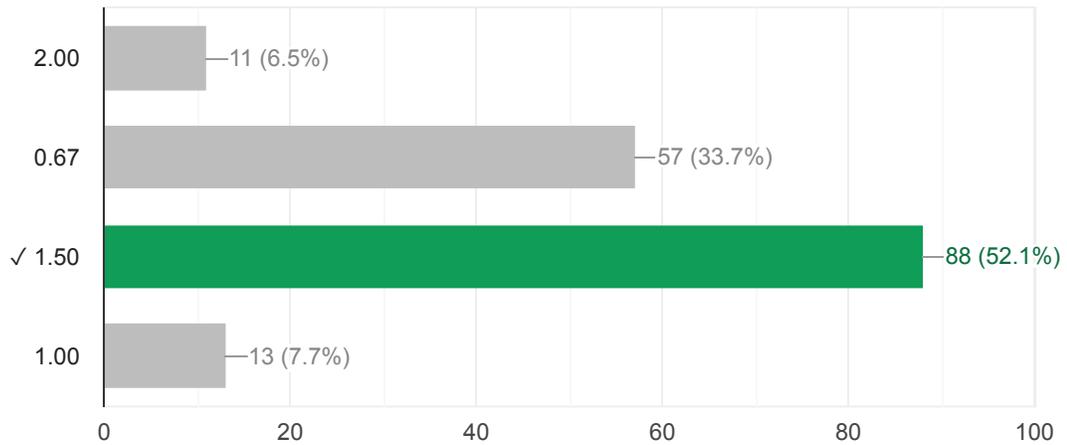

42 / 148 correct responses

The ratio of the energy correction factor to the momentum correction factor for a laminar flow in a pipe is

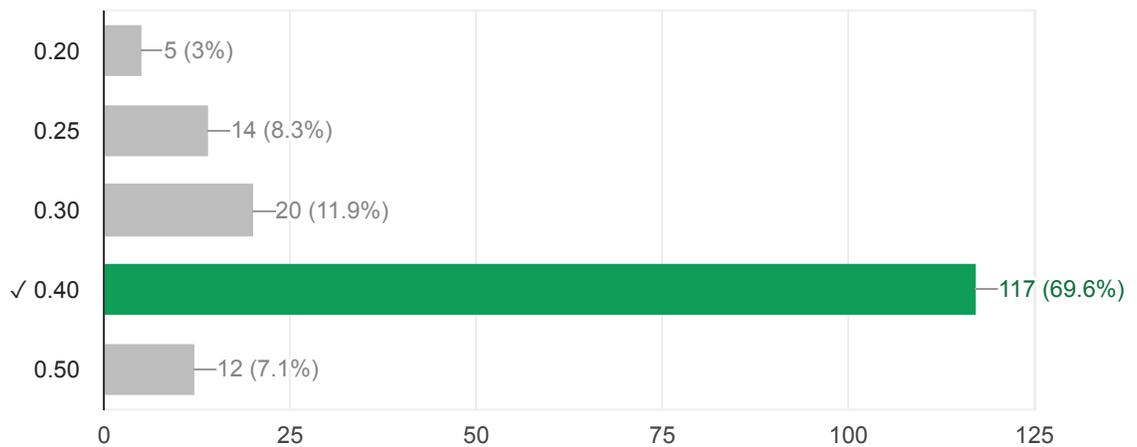

88 / 169 correct responses

For a given material Young's modulus is 210 GPa and modulus of rigidity is 75 GPa. The value of Poisson's ratio is

117 / 168 correct responses

# Online Test for Guest Lecturer (Civil Engineering)

Common Test for Government Polytechnic, Katihar, Khagaria and Bhagalpur

Date of Test- 31-05-2022, Timing- 11:00 AM to 11:30 AM (Duration= 30 min), Full Marks: 20

## IMPORTANT INSTRUCTIONS:-

1. Test consists of 20 questions carrying 1 mark each.
2. Test consists of Multiple Choice Questions (MCQ) as well as Multiple Select Questions (MSQ); a question may have one correct choice or multiple correct choices.
4. Attempt all questions. There is NO negative marking in any types of questions.
5. Candidates can SUBMIT only 1 Response.
6. Candidates are advised to SUBMIT test on or before 11:30 AM. After that test will be closed.

---

### \* Required

1. Email \*

\_\_\_\_\_

2. Name of the college applied for \*

*Mark only one oval.*

- Government Polytechnic, Katihar
- Government Polytechnic, Khagaria
- Government Polytechnic, Bhagalpur

3. Name of Candidate \*

\_\_\_\_\_

4. Father's/Husband's Name \*

\_\_\_\_\_

5. Date of Birth \*

---

*Example: January 7, 2019*

6. Gender \*

*Mark only one oval.*

Male

Female

7. Category \*

*Mark only one oval.*

## Online Test for Guest Lecturer (Civil Engineering)

Common Test for Government Polytechnic, Katihar, Khagaria and Bhagalpur

Date of Test- 31-05-2022, Timing- 11:00 AM to 11:30 AM (Duration= 30 min), Full Marks: 20

### IMPORTANT INSTRUCTIONS:-

1. Test consists of 20 questions carrying 1 mark each.
2. Test consists of Multiple Choice Questions (MCQ) as well as Multiple Select Questions (MSQ); a question may have one correct choice or multiple correct choices.
4. Attempt all questions. There is NO negative marking in any types of questions.
5. Candidates can SUBMIT only 1 Response.
6. Candidates are advised to SUBMIT test on or before 11:30 AM. After that test will be closed.

8. Which of the following is not a correct statement?

1 point

*Mark only one oval.*

- Planimeter is used for measuring area
- The first reading from a level station is a Foresight
- Basic Principal of surveying is to work from whole to parts.
- Contours of different elevations may intersect each other in case of an overhanging cliff

9. Which of the following is/are correct statement(s) ?

1 point

*Check all that apply.*

- In the case of fixed hair stadia tacheometry, the staff intercept will be larger, when the staff is held nearer to the observation point.
- Back bearing of a line is equal to Fore bearing  $\pm 180^\circ$
- The boundary of water of a calm water pond will represent contour line
- If the whole circle bearing of a line is  $270^\circ$ , its reduced bearing is  $90^\circ\text{SW}$

10. In shear design of an RC Beam, other than the allowable shear strength of concrete, there is also an additional check suggested in IS 456-2000 with respect to the maximum permissible shear stress. The check for max permissible shear stress is/are required to take care of

1 point

*Check all that apply.*

- additional shear resistance from reinforcing steel
- possibility of crushing of concrete by diagonal torsion
- additional shear stress that comes from accidental loading
- possibility of failure of concrete by diagonal tension
- none of the above

11. A partially saturated soil mass has bulk unit weight of 25 KN/cu.m and moisture content of 18.5 %. The specific gravity of soil solids is 2.65. On full saturation of soil sample, the unit weight of the soil sample will be \_\_\_\_\_ KN/cu.m. 1 point

*Mark only one oval.*

- 25.62
- 21.22
- 19.03
- 22.94
- 25.49

12. Which of the following statement/s is/are not correct ? 1 point

*Check all that apply.*

- Liquefaction is the phenomenon where cohesionless soil near the downstream side of dams or sheet-piles loses its shear strength due to high upward hydraulic gradient
- Black cotton soil exhibits expansive behavior
- Loose sand exhibits contractive behavior upon shearing
- Dense sand when sheared under undrained condition, may lead to generation of negative pore pressure
- Seepage velocity can be smaller than discharge velocity

13. Which of the following is/are correct reason(s) for providing nominal cover in RCC design ? 1 point

*Check all that apply.*

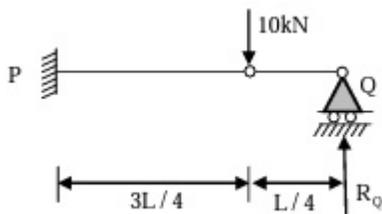

- To protect the reinforcement against corrosion
- To provide cover against fire
- To develop the bond strength along the steel bars
- None of the above

14. A rectangular open channel of width 4.8 m is carrying a discharge of 120 cu.m/sec. The critical depth of channel is 1 point

Mark only one oval.

- 3.69 m
- 3.19 m
- 3.99 m
- 7.09 m
- 4.21 m

15. For the beam loaded as shown below (see figure); the reaction at support Q will be \_\_\_\_\_ kN 1 point

Mark only one oval.

- 2.75
- 2.50
- 7.50
- 0.00
- 10.00

16. A tension member consisting of 8 mm thick plate is connected a gusset plate of 8 mm thickness by a fillet weld of 6 mm size. The effective length of weld is 125 mm. The permissible stresses in plates and weld are 150 MPa and 110 MPa respectively. The safe load carrying capacity of member in kN will be 1 point

*Mark only one oval.*

- 60.0
- 115.5
- 57.75
- 56.70
- None of the above

17. Due to increase in Di-calcium Silicate content in OPC, the heat of hydration 1 point

*Mark only one oval.*

- increases
- decreases
- initially increases and then increases
- does not change
- None of the above

18. Which of the following is/are not primary air pollutants? 1 point

*Check all that apply.*

- Hydrocarbons
- Nitrogen oxide
- Ozone
- Peroxyacetyl nitrate
- Volatile organic compounds

19. As per IS 10500:2012; The maximum permissible limit of total hardness (as calcium chloride equivalent in mg/L) in absence of alternate source is 1 point

*Mark only one oval.*

- 200
- 250
- 500
- 600
- 2000

20. The equation(s) used for the purpose of Hydraulic flood routing is/are 1 point

*Check all that apply.*

- Energy equation
- Continuity equation
- Bernoulli equation
- Momentum equation
- None of the above

21. If the optimistic time, pessimistic time and most likely time (in days) of an activity in the critical path are 8, 10 and 15 respectively, The value of expected time for the same activity will be 1 point

*Mark only one oval.*

- 10.33
- 10.50
- 37.33
- 12.50
- None of the above

22. For a highway, the design speed is 95 km/h. The acceleration due to gravity and deceleration rate are 9.81 m/sec square and 3.5 m/sec square. The reaction time is 2 sec. The stopping sight distance for highway will be \_\_\_\_\_ m approximately. 1 point

*Mark only one oval.*

- 145
- 140
- 152
- 165
- None of the above

23. A truss containing 'j' joints and 'm' members, It will be a simple truss if 1 point

*Mark only one oval.*

- $m = 3j - 2$
- $j = 3m - 2$
- $m = 3j - 3$
- $j = 2m - 3$
- None of the above

24. Which of the following is/are False statement(s)? 1 point

*Check all that apply.*

- Walls of half brick thick are measured in square meters
- No deduction in the brickwork quantity is made for openings in walls up to 1 Sq.m area
- Walls of one brick thick are measured in cubic meters
- For the measurement of excavation from the borrow pit in a fairly uniform ground, dead men are left at suitable intervals
- Dimensions are measured to the nearest 1 cm

25. Which of the following is/are incorrect statement(s) related to AutoCAD ? 1 point

*Check all that apply.*

- Object snap increases speed, accuracy and ease of drafting
- Function key F7 is used to set grid on or off
- If Snap is set off, the mouse cannot move to any intermediate point between the dots of the grid
- If Ortho is set on then all lines are drawn along the X and Y direction only.
- Most obvious way to select the object is to place the cursor over the object, click the mouse button

26. The ratio of the energy correction factor to the momentum correction factor for a laminar flow in a pipe is 1 point

*Mark only one oval.*

- 2.00
- 0.67
- 1.50
- 1.00

27. For a given material Young's modulus is 210 GPa and modulus of rigidity is 75 GPa. The value of Poisson's ratio is 1 point

*Mark only one oval.*

- 0.20
- 0.25
- 0.30
- 0.40
- 0.50
